Work Experience

FRONTEND ENGINEER | BARCLAYS
December 2022 – Present | Chennai, India

→ Developed and maintained responsive, user-friendly web applications using ReactJS, Javascript, Redux, and SASS.
→ Worked closely with UX designers to ensure that web applications were optimized for user experience and aligned with Barclays' brand guidelines.
→ Contributed to the development of new features and enhancements, taking ownership of individual components and collaborating with team members to integrate changes.
→ Participated in code reviews and provided feedback to team members, helping to maintain code quality and consistency across the team.

FRONTEND DEVELOPER | KYNDRYL
September 2021 – December 2022 | Bengaluru, India

→ Worked as a Frontend Developer using best practices on Advanced React JS (Functional Components, Context API, Hooks), Javascript, Material UI.
→ Collaborated with a team of 15 developers, participating in daily stand-ups and contributing to sprint planning and retrospectives.
→ Successfully deployed more than 20 cloud offerings to Production which received multiple clients and stakeholder appreciation.
→ Acted as a mentor to junior developers, providing guidance and support to help them develop their skills.

FRONTEND DEVELOPER | IBM
January 2020 – September 2021 | Bengaluru, India

→ Worked as a Frontend Developer for IBM CIO's Cloud Enablement Tool and was responsible for the delivery and maintenance of multiple offerings.
→ Actively contributed to the development of internal tools and libraries to improve development efficiency and code reusability.
→ Utilized Agile methodologies to prioritize tasks and effectively communicate progress and updates to team members and stakeholders.
→ Deployed more than 10 cloud offerings to Production without any issues/bugs.

Projects

AUTOMATED SHORT ANSWER SCORING USING LATENT SEMANTIC INDEXING
2020

→ Collaborated with a team of 4, in building a short answer scoring system using LSA(Latent Semantic Analysis) to find correct answers even if the reference answer and a potentially correct answer have a lack of shared keywords.
→ Leveraged Python libraries and NLP techniques to process the given dataset and to find an optimal approach which helped in achieving better accuracy(> 500%) and efficiency than traditional methods.
